Disclaimer

The assessments are based on a standardized system whose criteria were selected using scientific methods. When selecting the criteria, the meaningfulness and collectability of reliable information are core premises.

To ensure the objectivity of the analyses, data is collected from generally accessible corporate information that is published in accordance with statutory and standardized regulations or is deemed to be reliable. This includes in particular annual reports, SEC filings, sustainability reports and corporate governance reports of the respective company and information from data service providers and the companies themselves. However, The Value Group Sustainability GmbH has not verified the accuracy or completeness of the information collected and does not assume any liability for its accuracy or completeness.

The scores calculated from the selected criteria range from 0 to 100 (best possible score). The sustainability evaluations resulting from the scores range from C (insufficient) to AAA (excellent). The transparency score indicates how high the proportion of available data points is for a company in the fiscal year under review. A value of 100% would mean that data is available for all selected criteria.

The statements made in this report are for information purposes only and in no way serve as investment advice. The statements should not be interpreted as an offer or indication to buy or sell securities, to select a project, or to engage in any type of transaction, and do not constitute an evaluation of the economic performance, financial obligations or creditworthiness of the issuer.

Despite the high-quality standards, The Value Group Sustainability GmbH cannot guarantee the correctness, accuracy, and completeness of the evaluations. It cannot be excluded that due to human or technical failure as well as other factors the validity of the results may be impaired. Possible incomplete, inaccurate, or incorrect evaluations do not justify any responsibility or liability of The Value Group Sustainability GmbH for damages of any kind, neither for direct and/or indirect damages nor for consequential damages. In particular, The Value Group Sustainability GmbH does not assume any liability for statements, plans or other details contained in these analyses regarding the analyzed companies, their affiliated companies, strategies, economic, market and/or competitive situation, legal framework and others.

The report, the valuations and other information contained therein are for internal use only and may not be published or distributed. The Value Group Sustainability GmbH, its subsidiaries or third-party data providers are the owners of the information contained in this report, which is protected by copyright. All rights reserved.
